Design

The simple and elegant head and foot board design of the bed meets the hospital's infection control requirements and supports daily disinfection operations.

Plastic

Environmentally friendly plastic, non-toxic and odorless

Welding

Fully automatic robot seamless welding process, high quality welding

Platform

It is made of high-quality cold-rolled steel plate and stamped in one step, with a thickness of 1.0mm and a bed width of 900mm. It has a multi-hole design for breathability and anti-slip function. There are no solder joints on the surface, and there are steel pipe reinforcements on the back to extend the life of the hospital bed. It can bear a load of 200KG.

Siderail

Equipped with sixth aluminium alloy guardrail, the design concept is a combination of aluminum alloy horizontal bars and stainless steel vertical bars, which is corrosion-resistant, has both aesthetic appeal and increased strength.

Head & foot board

Simple and elegant bed head and foot shape, easy to disassemble and install, with medical record card at the foot of the bed.

Crank

Retractable ABS crank handle

Castors

Using medical silent wheels with a diameter of 125mm, and each caster has a brake.
